## Luminesce™ Light Panels

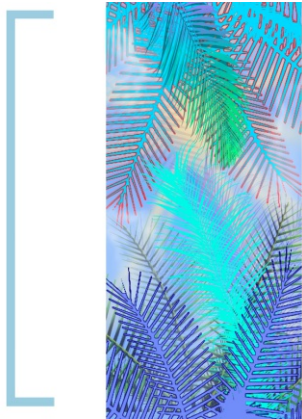

Create mood and ambiance with panels that allow light to come through in a way that softens the atmosphere. Great for hallways to create interest and for rooms where intense or direct lighting is not needed.

I am a big fan of mood lighting. In areas where you don't need blazing, bright lights, you might consider replacing the existing plastic protective covers with decorative light panels. Our designs have a feel good aura about them and very complimentary colors. Check out our selection in our catalog or on our website.

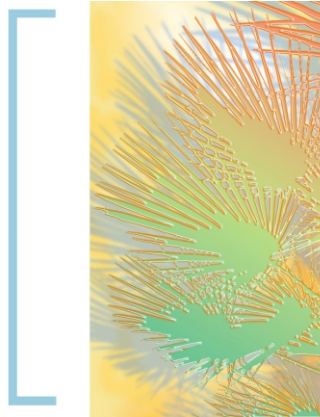

## Light Panels

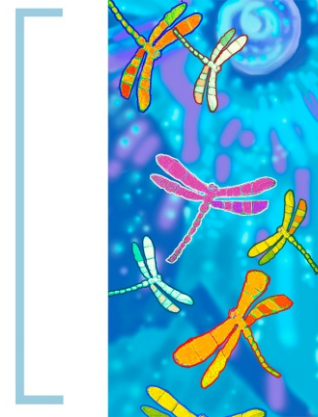

Our original artwork designs printed on Plexi are easily installed into existing fluorescent light fixture frames.

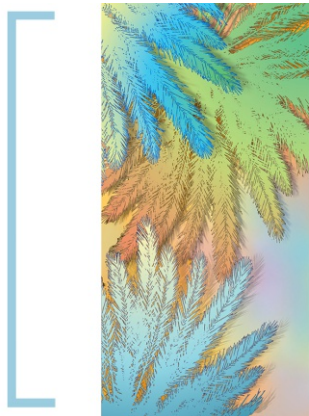

**LP-1 Palm Fron Bliss**
